DETAILED ACTION

1. Applicant's amendment and accompanying remarks filed January 21, 2009 are acknowledged.
2. Examiner acknowledges amended claims 16 and 18-20.
3. Examiner acknowledges newly added claim 21.
4. Examiner acknowledges cancelled claims 1-15.
5. The rejection of claims 11-15 under 35 U.S.C.102(b) as being anticipated by Nagle, U.S. Patent Number 4,915,908 is rendered moot due to applicant's cancellation of claims 11-15.
6. The rejection of claims 16-20 under 35 U.S.C. 103(a) as being unpatentable over Nagle, U.S. Patent Number 4,915,908 in view of Wei et al., U.S. Patent Number 5,400,505 is withdrawn due to applicant's argument.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the

Art Unit: 1794

reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

8. Claims 16-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Gadow et al., U.S. Pre grant Publication 2006/0021728.

Gadow discloses a semi-finished product that is manufactured by producing a reinforcement component that comprises silicon carbide fibers that are coated with titanium carbide or titanium nitride (see paragraphs 0025, 0066 and 0069). Gadow also discloses that ceramic particles are also embedded in the metallic matrix (see abstract and claim 12).

Paragraph 0065 of the reference discloses that the particles that are embedded in the metallic matrix are ceramic particles. Paragraph 0034 of the reference discloses that the coating can be done by plasma deposition spray coating as per instant claims 20-21. Paragraph 0077 of the reference discloses that the composite comprising the fibers and particles in the metallic matrix are consolidated under pressure at high temperatures. Gadow discloses that the composite is formed into near net-shaped products (see abstract).

Response to Arguments

9. Applicant's arguments with respect to the present claims have been considered but are moot in view of the new ground(s) of rejection.
